LM-79 Test Report

Relevant Standards

IES LM-79-2008
IES TM-30-2015
CIE 13.3-1995

Product SKU

BLAZE™ MINI 4mm LED Tape Light - 24V 3500K
DI-24V-BL4MN150-35-016

Test Conditions

Test Temperature: 26.5 °C
Luminaire Sample Length: 12.0 in.
Power Supply: Agilent E3634A DC Power Supply
   Voltage: 24 VDC
   Current: .305 A
   Power Consumption: 7.32 W

Test Date

5/15/2020

Prepared By

Olivia Tanguileg

Olivia M. Tanguileg, Electrical Engineer

Approved By

Andrew Lassen, Compliance Manager

The results contained in this report pertain only to the tested sample.
Photometric & Colorimetry data measured in accordance to IES LM-79-2008 standards, at the Elemental LED, Inc. Innovation Lab.

#### SOURCE CHROMATICITY COMPARISON

This chart plots the chromaticity of the test and reference sources in the CIE 1931 chromaticity.

#### SPECTRAL POWER DISTRIBUTION COMPARISON

This chart displays the spectral power distributions for the test and reference source. Each SPD has been normalized so that the maximum values is 100%.

#### CES CHROMATICITY COMPARISON

This plot shows the shift in chromaticity for each individual CES.

#### GENERAL COLOR RENDITION

This plot shows the $R_f$ and $R_g$ values relative to possible values.

#### COLOR VECTOR GRAPHIC

This plot shows the average chromaticity shift for the samples within each of 16 hue bins. The values are normalized so that the reference is a circle.
COLOR SAMPLE COMPARISON (APPROXIMATION)

</tr>
</tbody>
</table>

NOTE: CES stands for “Color Evaluation Sample”, these 99 samples are used in place of the 16 R values. The colors shown are approximate and depend on proper monitor calibration. Some colors may be outside of the gamut of the monitor, and will not be displayed accurately. For each sample, the color on the left represents the reference source, and the color on the right represents the test source.

Sample Type:
- A - Nature
- B - Skin
- C - Textiles
- D - Paints

COLOR RENDITION BY HUE

This chart displays the average Fidelity Index for all samples within the hue bin. The number of samples per bin, which can vary based on the CCT used for the calculation, is shown at the top. The color of the bar is based on the average chromaticity under the 5000 K reference illuminant; the colors may not display accurately depending on the calibration of the monitor, and should be used for orientation only.

COLOR FIDELITY BY SAMPLE

This chart displays the Fidelity Index for each of the 99 CES. The CES are arranged by their hue angle under the 5000 K reference source, which was also used to determine the color of each bar. The colors are approximate and depend on proper monitor calibration. Some colors may be outside of the gamut of the monitor, and will not be displayed accurately.

COLOR FIDELITY BY SAMPLE

This chart displays the change in chroma for the average sample within each hue bin. The number of samples per bin, which can vary based on the CCT used for the calculation, is shown at the top. The color of the bar is based on the average chromaticity under the 5000 K reference illuminant; the colors may not display accurately depending on the calibration of the monitor, and should be used for orientation only.

**SUMMARY OF RESULTS**

Luminaire: BLAZE™ MINI 4mm LED Tape Light - 24V 3500K  
SKU: DI-24V-BL4MN150-35-016  
Luminous Flux: 579 Lumens  
Power Consumption: 7.32 Watts  
Efficacy: 79.09 Lumens/Watt  
Spacing Criterion (0-180): 1.28  
Spacing Criterion (90-270): 1.26
