LM-79 Test Report

Relevant Standards

IES LM-79-2008
IES TM-30-2015
CIE 13.3-1995

Product SKU

BLAZÉ™ BASICS LED Tape Light - DI-24V-BLBSC1-50-W***

Test Conditions

Test Temperature: 26.5 °C
Luminaire Sample Length: 12.0 in.
Power Supply: Agilent E3634A DC Power Supply
Voltage: 24.0 VDC
Current: 0.064 A
Power Consumption: 1.54 W

Test Date

11/19/2018

Prepared By

Olivia M. Tanguileg, Electrical Engineer

Approved By

Andrew Lassen, Compliance Manager

The results contained in this report pertain only to the tested sample. Photometric & Colorimetry data measured in accordance to IES LM-79-2008 standards, at the Elemental LED, Inc. Innovation Lab.
Integrating Sphere Test

### SOURCE PROPERTIES

#### SPECTRAL POWER DISTRIBUTION COMPARISON

This chart displays the spectral power distributions for the test and reference source. Each SPD has been normalized so that the maximum values is 100%.

### GENERAL COLOR RENDITION

#### CES CHROMATICITY COMPARISON

This plot shows the shift in chromaticity for each individual CES.

#### COLOR VECTOR GRAPHIC

This plot shows the average chromaticity shift for the samples within each of 16 hue bins. The values are normalized so that the reference is a circle.
COLOR SAMPLE COMPARISON (APPROXIMATION)

NOTE: CES stands for "Color Evaluation Sample", these 99 samples are used in place of the 16 R values. The colors shown are approximate and depend on proper monitor calibration. Some colors may be outside of the gamut of the monitor, and will not be displayed accurately. For each sample, the color on the left represents the reference source, and the color on the right represents the test source.

Sample Type:
A - Nature
B - Skin
C - Textiles
D - Paints
E - Plastic

Elemental  |  Competitor
--- | ---
Ref | Test
This chart displays the average Fidelity Index for all samples within the hue bin. The number of samples per bin, which can vary based on the CCT used for the calculation, is shown at the top. The color of the bar is based on the average chromaticity under the 5000 K reference illuminant; the colors may not display accurately depending on the calibration of the monitor, and should be used for orientation only.

This chart displays the change in chroma for the average sample within each hue bin. The number of samples per bin, which can vary based on the CCT used for the calculation, is shown at the top. The color of the bar is based on the average chromaticity under the 5000 K reference illuminant; the colors may not display accurately depending on the calibration of the monitor, and should be used for orientation only.

This chart displays the Fidelity Index for each of the 99 CES. The CES are arranged by their hue angle under the 5000 K reference source, which was also used to determine the color of each bar. The colors are approximate and depend on proper monitor calibration. Some colors may be outside of the gamut of the monitor, and will not be displayed accurately.
SUMMARY OF RESULTS

Luminaire: BLAZE™ BASICS LED Tape Light
SKU: DI-24V-BLBC1-50-W***
Luminous Flux: 109 Lumens
Power Consumption: 1.54 Watts
Efficacy: 70.78 Lumens/Watt
Spacing Criterion (0-180): 1.24
Spacing Criterion (90-270): 1.24
