

SPOTMOD®

TILE & LINK LED Fixtures

We proudly introduce the next additions to the SPOTMOD® family: SPOTMOD TILE and SPOTMOD LINK. Both fixtures feature exceptional color rendering with 90+ CRI values and architectural grade styling with slim, ultra-sleek profiles. The single LED “Chip-on-Board” design provides a single light source shadow that is ideal for modern and sophisticated applications. Each lightweight fixture delivers 220+ lumens of light making them ideal for under cabinet and display lighting applications.

SPOTMOD® TILE

This ultra-bright and low-profile fixture can be easily surface mounted onto most surfaces with only two enclosed screws.

SPOTMOD® LINK

The SPOTMOD LINK features daisy chain connectors for multi-fixture installations (up to seven) and can be surface mounted or recess mounted.

SPOTMOD TILE
